RETURN ON RATE BASE COMPUTATION

1. The data used in calculating rate base are averages.
2. Calculate those averages by summing the first-of-year and the end-of-year figures for each account and then dividing the sum by two.
3. Note: Do not include property held for future use or construction work in progress with utility plant in service. These are not rate base components.

IMPORTANT CHANGES DURING THE YEAR

Report changes of any of the following types:

1. Acquisitions.

All acquisitions are detailed in footnotes for W8.

2. Leaseholder changes.

3. Extensions of service.

4. Estimated changes in revenues due to rate changes.

5. Obligations incurred or assumed, excluding commercial paper.

6. Formal proceedings with the Public Service Commission.

7. Any additional matters.

In 2000 we added a part-time employee, Rae Wellnitz, to assist with billing and collection. She will also back up the accounting and payroll position when necessary.

2000 Analytical Review DWCCA-3820-PJL

Dear Mrs. Waefler:

Thank you for your response to our letter of October 23, 2001, concerning the analytical review of your 2000 annual report. Your answer has been helpful in providing information that will enable us to better provide guidance to your utility regarding proper utility accounting and the preparation of future annual reports. However, we feel the following items need further clarification before we can complete this analytical review. The items are numbered from our previous letter.

1. Regardless of the fact that the property tax equivalent is waived, the utility should still calculate and report the Local and School Tax Equivalent on Meters Charged to Sewer Department on page W-6. Please follow this procedure in the future.

2. Please note that in the future the rental income should be recorded in Account 472, Rents from Water Property on page 472.

If you have any questions regarding either of these items, please contact Kathy Butzlaff of our staff at (608) 267-9817.

Thank you for your efforts in preparing your 2000 annual report. We are closing the review of your 2000 annual report. If you have any other questions, please feel free to contact me at (608) 267-9198 or by e-mail at peter.leege@psc.state.wi.us

2000 Analytical Review DWCCA-3820-PJL

Dear Mrs. Waefler:

The Public Service Commission staff is in the process of completing an analytical review of your utility's 2000 annual report. The purposes of an analytical review are to detect possible reporting or accounting related errors and to identify significant fluctuations from established trends in reported data not sufficiently explained in the annual report. It is our hope that this review will supply information that will enable us to better provide guidance to your utility regarding proper utility accounting and the preparation of future annual reports. In order to complete this review, we request the following information:

1. During our review, we noted that the utility did not report any local and school tax equivalent on meters charged to sewer department, (Account 408). If the sewer department uses the water meter to measure sewer volume, all the water meter costs must be shared, including depreciation, return on rate base and taxes. Please review Section 4, Pages 10 and 11 of the Water Utility Reference Manual (enclosed) and properly allocate all water meter costs for 2001. We also noted that it is indicated on the Identification and Ownership page that sewer service is not rendered by the utility. Please Check the "Yes" indicator in the future.

2. In Account 418 on page F-2 it is explained that the rental income recorded there is from an apartment owned by the utility. Please explain what account that asset is recorded in.

We appreciate your cooperation in providing the above information. These recommendations are intended to provide accounting assistance and should not be construed as criticisms of utility personnel. If you have any questions, please feel free to contact me at (608) 267-9198. Please respond within 30 days of this letter. We prefer that you respond by e-mail if it is convenient

for you to do so. My e-mail address is leegep@psc.state.wi.us. If we have no questions regarding your response, you can consider the review closed.

Sincerely,

Peter J. Leege

Enclosure

Response letter received 10/30/01:

#1 "For the year 2000 the City of Monroe waived our property tax

FINANCIAL SECTION FOOTNOTES

#1, "For the year 2000 the City of Monroe waived our property tax equivalent, therefore I did not include an amount on line 2 of page W-2. The waived amount for the total property tax equivalent I entered on line 10 of page F-2 for Account 434. My interpretation was if we were not paying the 2000 property tax equivalent now or in the future that was all I should do with the amount waived. Please let me know if that was the correct interpretation."

#2, "The apartment owned by the utility and currently rented out is part of the main plant building. This building housed the original pumping plant for wells 1 and 2 that were abandoned in 1985, an apartment that was furnished to the water master or superintendent as well as an office. When the plant was destroyed by a toronado in 1965 and rebuilt it appears these costs were booked to Account 321. It appears that some remodeling was done in 1990 and booked to Account 390. I hope this answers your question."

Follow up letter will be sent.

PROPERTY TAX EQUIVALENT (WATER)

1. No property tax equivalent shall be determined for sewer utilities or town sanitary district water utilities.
2. Tax rates are those issued in November (usually) of the year being reported and are available from the municipal treasurer. Report the tax rates in mills to six (6) decimal places.
3. The assessment ratio is available from the municipal treasurer. Report the ratio as a decimal to six (6) places.
4. The utility plant balance first of year should include the gross book values of plant in service, property held for future use and construction work in progress.
5. An "other tax rate" is included in the "Net Local and School Tax Rate Calculation" to the extent that it is local. An example is a local library tax. Fully explain the rate in the Property Tax Equivalent schedule footnotes.
6. The Property Tax Equivalent to be reported for the year is determined pursuant to Wis. Stat § 66.0811(2). Report the higher of the current year calculation or the tax equivalent reported in the 1994 PSC annual report, unless, the municipality has authorized a lower amount, then that amount is reported as the property tax equivalent.
7. If the municipality has authorized a lower amount, the authorization description and date of the authorization must be reported in the Property Tax Equivalent schedule footnotes.

WATER MAINS

1. Report mains separately by pipe material, function, diameter and either within or outside the municipal boundaries.
2. Identify pipe material as: L (Lead), M (Metal for all other metal excluding lead), A (Asbestos-cement), or P (Plastic for plastic and all other non-metal excluding asbestos-cement).
3. Identify function as: T (Transmission), D (Distribution) or S (Supply).
4. Explain all reported adjustments as a schedule footnote.
5. For main additions reported in column (e), as a schedule footnote:
 - a. Explain how the additions were financed.
 - b. If assessed against property owners, explain the basis of the assessments.
 - c. If the assessments are deferred, explain.

WATER SERVICES

1. Explain all reported adjustments as a schedule footnote.
2. Report in column (h) the number of utility-owned services included in columns (c) through (g) which are temporarily shut off at the curb box or otherwise not in use at end of year.
3. For services added during the year in column (d), as a schedule footnote:
 - a. Explain how the additions were financed.
 - b. If assessed against property owners, explain the basis of the assessments.
 - c. If installed by a property owner or developer, explain the basis of recording the cost of the additions, the total amount and the number of services recorded under this method.
 - d. If any were financed by application of Cz-1, provide the total amount recorded and the number of services recorded under this method.
4. Report services separately by pipe material and diameter.

METERS

1. Include in Columns (b), (c), (d), (e) and (f) meters in stock as well as those in service.
2. Report in Column (c) all meters purchased during the year and in Column (d) all meters junked, sold or otherwise permanently retired during the year.
3. Use Column (e) to show correction to previously reported meter count because of inventory or property record corrections.
4. Totals by size in Column (f) should equal same size totals in Column (o).

HYDRANTS AND DISTRIBUTION SYSTEM VALVES

1. Distinguish between fire and flushing hydrants by lead size.
 - a. Fire hydrants normally have a lead size of 6 inches or greater.
 - b. Record as a flushing hydrant where the lead size is less than 6 inches or if pressure is inadequate to provide fire flow.
2. Explain all reported adjustments in the schedule footnotes.
3. Report fire hydrants as within or outside the municipal boundaries.

| Number of distribution valves operated during year: | 149 |

WATER OPERATING SECTION FOOTNOTES

Water Operating Revenues - Sales of Water (Page W-02)

We saw a slight decline in Residential and Commercial water sales in 2000. Beatrice Cheese closed the local facility mid-year which accounted for the Commercial water sales decrease. We will see further decline in 2001 with the closing of the Butter and Cheese Division of Saputo in January. Saputo is our most significant customer.

During the year we did an audit of the Private Fire Lines and found some lines that were not being charged. We have corrected these accounts.

The customer count should be 4203. The system would not allow a "0" to be entered on the Private Fire and Public Fire customer lines.

Other Operating Revenues (Water) (Page W-04)

Acct. 470: Customer late payment charges continue to decrease with our more aggressive collection procedure in place.

WATER OPERATING SECTION FOOTNOTES

Water Operation & Maintenance Expenses (Page W-05)

Acct. 622: Early in 2000 we had Well #3 down for repairs and were forced to run our Time of Day Well #6 pump during peak hours. We were also impacted by higher utility rates.

Acct. 625: We incurred \$30,048 in repairs to Well #3 for replacement of Bronze bowels and a sand separator due to electrolysis problems. We also installed reference electrodes and anode to monitor and defuse the electrolysis. In 2001 we will have repairs for Well #6.

Accts. 630 - 635: We saw a slight increase in chemical prices and did maintenance on a chemical pump and anti-syphon valve.

Acct. 650: We did maintenance around the reservoir at Well #5 to complete the work we started last year. We also drained and cleaned the reservoir at Well #6.

Acct. 651: We experienced some large breaks that cost more in labor and street patches. There were several street projects in town that required labor from us to raise or lower valve boxes and required manhole repairs to be done.

Acct. 654: We are undertaking a more aggressive maintenance program with our hydrants. The system has many older hydrants that require more maintenance. We are trying to schedule more hydrant replacement because of the age and maintenance required.

Acct. 920: Early in 2000 we hired a part-time person to assist with the billing and collection processes. This freed up more time for Sandy Waefler to perform administrative and general functions.

Acct. 923: With the addition of the part-time person to assist with billing and collection Sandy Waefler now does all monthly accounting functions as well as the year end closing of the books and PSC report. The outside assistance is down to a minimum.

Acct. 930: Miscellaneous expenses have been cut considerably by operators booking time and expenses to the correct accounts.

Acct. 933: The increase for transportation expense is due largely to the increase in gas prices. We also did some repairs to our small dump truck.

WATER OPERATING SECTION FOOTNOTES

Water Utility Plant in Service (Page W-08)

Acct. 343: In 2000 we installed 2610 feet and retired 1702 feet of distribution main. 1819 feet were contributed by TIF projects at a cost of \$66,990.

Acct. 345: Services increased by 9 in total.

Acct. 346: Meters added were 547 and retired were 526.

Acct. 348: Hydrant count remained the same with 11 added and 11 retired.

Acct. 391: The utility purchased a fireproof file cabinet and a stand for the laser printer.

Acct. 392: A used step van was purchased from the local Wastewater Treatment plant and equipped to use for main breaks and service leaks. We also purchased a new John Deere lawn mower and traded in the Snapper mower we had.

Acct. 394: A cut off machine was purchased. A new ditch pump was purchased to replace one which was broken and we retired.

Acct. 397: A radio was purchased and installed in the step van. We also purchased two additional hand held radios for the operators.

Water Mains (Page W-15)

In addition to the \$66,990 of TIF money to extend 6th Street and reconstruct 10th Avenue West, we also received CDBG grant money in the amount of \$31,440 to help defray the 13th Street project which had a cost for mains of \$53,832.

Water Services (Page W-16)

In the 13th Street project we installed 64 new services and retired 68 old services. Of the \$72,315 project cost for services we received \$39,501 from the CDBG grant. \$2,995 was booked to services for future use.

Meters (Page W-17)

We made an adjustment of 1 to the count for .625 meters. We could not locate an error in our counts.

Hydrants and Distribution System Valves (Page W-18)

In 2000 we had several construction projects in town that were labor intensive for our operators. This left us short handed and only allowed time to operate a third of the valves in the system.
